Tejaswini S

Mathematics Educator | Coding -Robotics Instructor | STEM Curriculum Developer

Phone:
+358415800803

Email:
Tejaswini210601@gmail.com

Address:
Joensu,Finland

PROFESSIONAL SUMMARY

Results-driven Mathematics and STEM Educator with 6+ years of teaching and training experience, having trained 500+ students across schools, online platforms, NGOs and community workshops.
Experienced in teaching school-level mathematics, coding, robotics and computer science to children aged 5–17. Skilled in developing students' logical reasoning, mathematical thinking, computational skills and independent problem-solving abilities.
Experienced in delivering live online sessions to international students, including 100+ sessions with US-based learners at BrightCHAMPS. Strong background in curriculum development, personalised instruction, project-based learning and interactive teaching methodologies.
Holds a Bachelor's degree in Computer Applications and is currently pursuing an MSc in Information Technology at the University of Eastern Finland.

CORE SKILLS

Category	Skills & Competencies
Mathematics	Arithmetic, number systems, fractions, decimals, percentages, ratios, algebra, equations, geometry, mensuration, patterns, number theory fundamentals, logical reasoning and word problems.
Olympiad Learning	Mathematical puzzles, non-routine problems, reasoning strategies, pattern recognition, number theory, critical thinking, Olympiad preparation and guided problem-solving.
Coding & STEM	Python, Java, Scratch, Pygame, HTML, MIT App Inventor, block-based coding, AI literacy, Arduino, electronics and robotics.
Teaching & Curriculum	Online instruction, lesson planning, curriculum development, project-based learning, classroom management, student assessment, personalised mentoring, parent communication.

PROFESSIONAL EXPERIENCE

Curriculum Developer & Coding/Robotics Trainer | Geniusus
Sep 2025 – Present
- Design STEM curriculum and deliver coding and robotics programmes reaching 500+ students.
- Teach Python, Scratch, Pygame, HTML and MIT App Inventor.
- Conduct hands-on robotics projects using Arduino, LEGO EV3, SPIKE Prime and Makerzoid.

Coding & Robotics Trainer | BrightCHAMPS
Sep 2024 – Sep 2025
- Delivered 100+ live online sessions to US-based students.
- Taught Python, Scratch, robotics and MIT App Inventor.
- Monitored student progress and communicated learning updates to parents.

IT Teacher | Narayana e-Techno School
May 2023 – May 2024
- Taught CBSE Computer Science to Grades 5–10, including Python, Scratch and digital literacy.
- Introduced Arduino, electronics and sensor-based projects.
- Organised coding competitions and provided personalised student support.

Independent Robotics & Computer Trainer | Freelance
2019 – 2023
- Delivered coding and robotics workshops across schools, NGOs and summer camps.
- Taught Scratch, Python, Arduino and HTML through project-based learning.

TECHNOLOGY & TEACHING PLATFORMS

- Programming: Python, Java, Scratch, Pygame, HTML
- Robotics & STEM: Arduino IDE, LEGO EV3, SPIKE Prime, Makerzoid, PictoBlox
- Development Tools: Visual Studio Code, Git, GitHub
- EdTech & LMS: Code.org, Tynker, Moodle, Google Classroom
- Interactive Learning: Kahoot!, Quizizz, H5P, Genially
- AI Tools: ChatGPT, Claude, Google Gemini
- Design & Productivity: Canva, MS Office, Excel, PowerPoint
- Communication: Zoom, Google Meet, Microsoft Teams

PROJECTS:

Mathematics Projects

1. Mathematics Olympiad Problem-Solving Collection

- Developed structured mathematical challenges covering number theory, algebra, geometry, numerical patterns and logical reasoning.

2. Interactive Mathematics Learning Module

- Created concept-based exercises, visual explanations and practice questions for school students.

Coding & Technology Projects

1. Line-Following Robot

- Built an autonomous robot using Arduino Uno, IR sensors and a motor driver module.

2. Obstacle-Avoidance Robot

- Developed a robotics project using an ultrasonic HC-SR04 sensor and servo motor.

3. Smart Home Automation System

- Developed an Arduino-based automation system to control lights, fans and buzzers.

4. Scratch Game Development

- Introduced students to programming logic, loops, conditions, events and debugging.

6. MIT App Inventor Projects

- Introduced students to event-driven programming, user interfaces and application logic.

EDUCATION

MSc in Information Technology
University of Eastern Finland, Finland | 2026–Present

Bachelor of Computer Applications (BCA)
RNS First Grade College |2019–2022

Pre-University Course (PCMB)
RNS First Grade College | 2017-2019

10th Standard | Karnataka State Board | 95%
Basaveshwara English High School

LANGUAGES

- English
- Hindi
- Kannada
- Finnish (Beginner)

CERTIFICATION & HIGHLIGHTS

- **STEM.org Authenticated Educator Badge—in progress.**
- **Learning Experience Design: Orientation to the Profession**
  University of Michigan | Coursera | In Progress (41%)

- Trained 500+ students; delivered online instruction to international learners; conducted NGO and community workshops; guided students in building and demonstrating robotics projects.
